

WKK has been a partner/distributor of Hongshang heat shrink tubing for over 10 years. We are proud to take the next step and to start with the collaboration with Weldy (a Leister brand). Weldy is a renowned producer of crimping equipment, active in more than 80 countries. With this collaboration, WKK offers you a full service package in the field of heat shrink tubing.

Weldy's hot air guns are designed for ease of use, accuracy and high quality crimping results. We now start with 3 types, but we can offer the complete range of Weldy and Leister products.

Please contact us for a further explanation of the possibilities we can offer you.

HG 330-A The powerful heat gun

The HG 330-A heat gun, also called a hot air blower, is powerful and easy to operate. This ergonomic hot air gun can be used for countless applications. The temperature can be set in five degree intervals between 80°C and 650°C. Thanks to the digital temperature control, the set temperature is fixed and remains constant - independent of the set air volume and the attachment used.

Product information

- Digital temperature control so that the set temperature is fixed and remains constant
- Ergonomic handle for easy use
- Memory function with five storage locations for temperature and blow settings
- Supplied in case

Technical information

Voltage	230 V
Max. power	2300 W
Temperature	80 - 650 °C
Air volume	200 - 550 l/min
Dimensions (L x W x H)	250 x 80 x 230 mm
Weight	0.75 kg

HG 330-S The multifunctional heat gun

The HG 330-S is a powerful heat gun, also known as a hot air blower. It is suitable for many professional jobs due to the continuous fast temperature selection between 80°C and 600°C and because of the two-stage blower. The HG 330-S makes jobs that require hot air, such as shrinking heat shrink tubing, easier thanks to the high heat and blowing power, the low weight and the ergonomic handle.

Product information

- Stepless rapid temperature selection and two-stage blower
- Ergonomic handle for easy use
- High heat blowing power
- Supplied in case

Technical information

Voltage	230 V
Max. power	2000 W
Temperature	80 - 600 °C
Air volume	250 - 550 l/min
Dimensions (L x W x H)	250 x 80 x 230 mm
Weight	0,70 kg

HG 330-B

The compact heat gun

The HG 330-B heat gun is a powerful hot air blower with two quick temperature switching stages, where you can choose between 350°C and 550°C. This hot air gun is a useful tool for various tasks that require hot air thanks to its low weight and the comfortable handle.

Product information

- Combines efficiency with solid performance
- Two fast temperature switching stages and two stage blower
- Ergonomic handle for easy handling
- Supplied in box

Technical information

Voltage	230 V
Max. power	1600 W
Temperature	350 - 550 °C
Air volume	350 - 500 l/min
Dimensions (L x W x H)	250 x 80 x 230 mm
Weight	0,70 kg
